

a greener choice

The Best Is Always Superior

At **Superior Windows & Doors**, our company philosophy is simple: to provide our customers with energy-efficient, maintenance-free products that help to lower their energy bills.

Save energy, save money

- Superior's Intercept® high performance warm-edge spacer system insulates the window frame and edge of glass up to 50 percent better than roll-formed metal spacers and up to 90 percent better than aluminum spacer bars.
- Superior's Climate Shield™ Low-E glass includes up to three layers of a thin silver coating that allows ample visible light to pass through, while blocking infrared and ultraviolet radiant solar energy. The result: cooler rooms in summer and warmer rooms in winter.

Green from start to finish

- The majority of our vinyl is compounded and extruded in-house, which allows us to reduce our waste and control our recycling efforts. We recycle our vinyl scrap to maximize yield and minimize the impact on local landfills.
- Our lead-free PVC vinyl is not petroleum-based, so its production requires no burning and generates no harmful gases.
- Reclaimed glass from external and internal sources makes up 24 to 28 percent of the raw materials used to produce our glass.
- Extended life cycles for many of our windows help save energy in America's homes.

Realize your goals with Superior

No matter what challenge you're facing, Superior can help you:

- Select the optimal product for your climate zone
- Achieve the results you seek while pursuing credits toward LEED certification or the NAHB Residential Green Building Standard
- Navigate the intricacies of Title 24 (California building code)
- Achieve ENERGY STAR® compliance

®ENERGY STAR is a registered trademark of the U.S. Department of Energy.

Superior manufactures windows and doors to meet or exceed ENERGY STAR requirements.
