

TOMORROW'S

**COLOR TECHNOLOGY
FOR VINYL WINDOWS AND DOORS**

Today!

The Best Is Always Superior™

A new dimension

to personalizing your home! We now offer ColorCoat, the latest exterior paint technology that is both heat and light reflective. This new paint technology allows exterior color on vinyl windows and doors for the first time ever! Now you can add color to your vinyl windows and doors to coordinate, harmonize and extend other Superior enhancements, such as v-groove and leaded glass, and simulated true divided light grids.*

ColorCoat is perfect

for vinyl windows and doors in all residential settings. It compliments your home's exterior architectural style and beauty and is favored by homeowners associations and in condominium communities. With our new reflective paints a whole new range of exterior color is available for your vinyl windows and doors.

- Environmentally friendly – meets all EPA and state requirements.
- Contains no lead or chromates.
- AAMA tested. Meets all rigid adhesion and heat gain testing required for PVC/vinyl windows and doors.
- Excellent adhesion and durability.
- Unsurpassed heat reflective properties.
- Technologically advanced resistance to UV and other weathering conditions.
- Superior resistance to thermal shock from major variance in temperatures.
- 10 year warranty on exterior finish.

*Available on exterior surfaces only. Choose between white and almond for interior colors. Not available on garden windows or internal grids.

Color swatches are intended as a representation only. Due to printing limitations, actual colors may vary.

HYDRO-FLEX II PIR (Heat Reflective) PRODUCT DESCRIPTION

HYDRO-FLEX II PIR POLYURETHANE TOPCOAT is a high performance, heat reflective, single component water dispersible polyurethane. HYDRO-FLEX II PIR is formulated with heat reflective pigments to provide the option of painting multiple substrates to include vinyl and plastic with dark colors that minimize heat gain. The product also offers outstanding coverage, excellent durability and is easy to apply. HYDRO-FLEX II PIR is a low VOC and EPA compliant coating.

TESTING

HYDRO-FLEX II PIR POLYURETHANE TOPCOAT has been tested according to AAMA Standards.
